

RUMI

Bangladesh | mhxrumi@gmail.com | github.com/xRumi/

SUMMARY

Strong interest in low-level programming, embedded systems. Currently studying CSE. Also exploring backend development/SaaS with Django and Go. Fast learner, attentive to detail.

EDUCATION

Bachelor of Science in Computer Science and Engineering

Nov 2025 ~ 2029

Mymensingh Engineering College, Mymensingh

PROJECTS

Weather App *C++ · Qt/Qml · CMake*

- Built a cross-platform application that displays real-time weather conditions.
- Reads live-readings from an MCU connected to DHT11 sensor over UART line and displays temperature and humidity visually.

<https://github.com/xRumi/QWeather/>

AVR-Projects *C · Assembly · avrdude · Makefile*

- Programmed an ATtiny45 microcontroller via USBasp programmer.
- Implemented precise delays, bit-banged software UART without hardware UART support.
- Interfaced with a DHT11 sensor for live temperature and humidity reading using raw digital signals.

<https://github.com/xRumi/AVR-Projects/>

yanGameEngine *C · Vulkan · GLSL · Wayland · Makefile*

Yet Another Nameless Game Engine with no actual goal.

- Built glTF model renderer with simple animations.
- Built simple physics with collision detection.
- Implemented multi-thread to separate rendering from main thread.
- Using this engine, built Flappy Bird clone that runs at ~4.5k FPS on 780M iGPU.

<https://github.com/xRumi/yanGameEngine/>

FoF22 *Nodejs · SocketIO · EJS · Redis · MongoDB*

- Built a real-time chat application supporting direct messages and group messaging.
- Used Redis alongside MongoDB to cache DB queries.

<https://github.com/xRumi/FoF22/>

SKILLS

Languages: C/C++, Python, JavaScript, Java, Go, x86 & AVR Assembly

Tools: Qt/Qml, KiCad, Django, Docker, PostgreSQL, Redis, CMake, Makefile

Spoken Languages: English, Bengali
